

Jack Germain

Software Engineer

SUMMARY

Results-driven software engineer specialising in modern full-stack web development. Experienced in delivering responsive, accessible, and scalable applications with a record of shipping production-ready projects.

WORK EXPERIENCE

Software Engineer at 100devs, Remote

January 2025 — Present

- Engineered full-stack web applications that support responsive design across desktop and mobile devices using React, Node.js, MongoDB, and more.
- Collaborated within Agile teams, delivering features on schedule with 100% on-time completion rate
- Implemented semantic HTML accessibility standards, reducing accessibility audit issues across multiple projects

Recent Projects:

[Online Portfolio](#) – Personal portfolio with 100+ monthly visitors showcasing projects, skills, and contract workflows.

[100Jobs](#) – React job board with full CRUD, Tailwind CSS, React Router, and JSON server API integration.

[ShiftDrop](#) – Full-stack workforce scheduling platform built with React, TypeScript, MongoDB, Node/Express, and JWT Authentication.

Other Projects: [WhatsWatched Movie Tracker](#), Leeds United StarGazers Society APOD Web App with NASA API integration, On-demand background color changer for Partnered Twitch streamer, and many more

Full Stack Web Developer at FullStackByJack | Huddersfield, UK

January 2025 — Present

Delivered on over 5+ client websites for small-to-medium businesses, from requirements gathering to design and development to deployment. Consulted on SEO fundamentals and content structure, contributing to ~20% increase in organic traffic:

[Zenia Bakery](#) – Developed a brand-focused website, increasing social media traffic by ~25%

[Green Cars Airport Transfers](#) - A conversion-optimised one-page site with EmailJS booking integration, cutting manual booking time by 50%

Restaurant Manager at Merrie England Oakes | Huddersfield, UK

September 2020 — Present

Led daily operations and closing procedures, handling cash reconciliation exceeding £4000 per shift with no discrepancies. Improved shift efficiency and task delegation, reducing closing time by 50%.
